

**ORIGINAL MANUFACTURER
OF INSTALLATION-READY, HEAVY DUTY
HIGH-SECURITY PANIC GATES**

Our heavy duty security panic gates are designed for both security and safety, and are manufactured to be the strongest link in your secure fence line.

Gates come pre-assembled and ready for quick, easy installation.

Made from 3" x 3" 11-gauge steel, these gates are built to withstand many years of industrial abuse in outdoor or indoor environments, and are guaranteed to be "sag proof".

US Pat. No. 7,686,283 & Pat. Pending

SECURE GATE SYSTEMS, INC.

Uses

Crucial for high security areas such as: gas/power/chemical plants, refineries, pipelines, correctional institutions, schools, stairwells, hallways, storage areas, coast guard requirements and more.

Safety

In an emergency you can not afford to just hope for the best, but you can afford to have the best. Safety is guaranteed. Keep up to compliance (ULCode 325).

Security

Our gates are going to be the most secure portion of your fence line. Only select personnel can gain entry. Our gates are tamperproof, excluding torch, high powered rescue saws, or explosives.

Quality

Made in the USA. Secure Gate Systems, Inc. is a division of a family-owned business in operation since 1930.

Guarantee

We stand by our product guarantee that our gates will maintain constant alignment and never shift or sag due to our 360° exterior jamb and stainless steel Secure Gate Systems, Inc. hinges.

Simple Installation

Developed with the installer in mind, our gates allow fast, easy, and complete installation in half a day or less. Flush mounts are even quicker to install.

Included Components - All Models

All brackets, shields, and covers
Two 18" sheets of expanded metal
Reflective stickers
Exit sign
All hardware for specified model

Multiple Finishes

Choose a finish to enhance function:

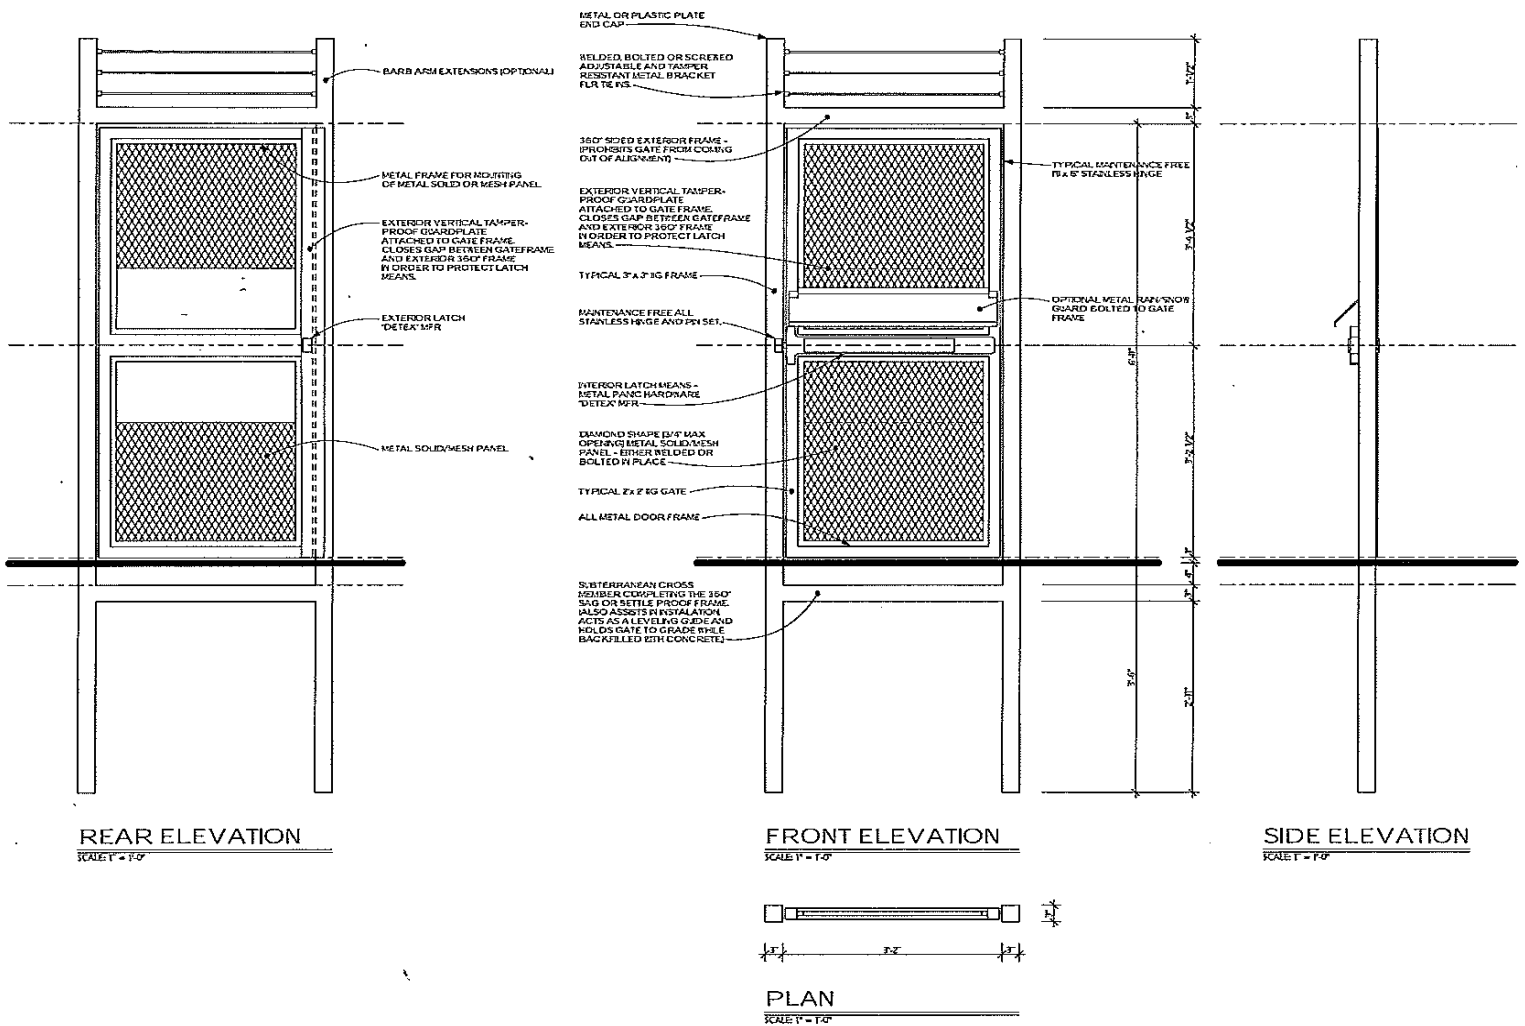

- Standard – Galvanized with galvanized paint over all welds
- Galvanized Dipped – Completely galvanized wells
- Powder Coated – Completely powder coated in different colors
- Glow-in-the-Dark – Completely powder coated (indoor use only for emergency light failure)
- Stainless Steel

Industrial Gate Models

All of our gates come pre-assembled and are ready for installation. Choose a means of egress that suits your needs and we will incorporate the necessary hardware.

- SEG 100: Standard crash bar hardware (Detex) with keyed entry.
- SEG 200: Electromagnetic Doortronics crash bar with key pad/card entry & door closer
- SEG 300: Heavy duty push button mechanical code lock with keypad on one or both sides
- SEG 400: Special – we will incorporate other means of entry/egress (Secure guard, proximity readers, biometrics, etc.)
